

Aptean OSAS

Lawtag Tracker

Print the labels you need, and much more. Setup your products in the SQL database. Easily create schedules as collection of items and quantities to be produced. Create new serial numbers and print law tags, bagger labels, and scheduling reports with a press of a button. Store FR Lot numbers and other details with each serial number for quick retrieval when needed. Search through full serial number history by number, production date, schedule number, item ID, or various other details. Easily reprint labels, update FR lots and other data for one or multiple serial numbers at a time.

Product Features

- Define your own Size Codes, Made/Sold by, Material Percentage, Prototypes and Products.
- Customize information stored for products and serial numbers.
- Standard and custom formats for law tags and bag labels based on your requirements; use your existing printers (requires Windows driver) and label media.
- Use alternate label formats for specific products if desired.
- Flexible data display in grids – save view as global or user based; group by, filter, sort by chosen cumns; export capabilities to spreadsheets.
- Production scheduling is a breeze – specify products and quantities to produce; create multiple schedules per day or add to existing schedule.
- Serial numbers are generated by schedule with predefined FR lot data completed, editable after the fact by authorized users.
- Prints law tags and bag labels per your specifications to any label printer (requires Windows driver); print for entire schedule or selected serial numbers.
- Serial numbers are stored in history complete with details - dates, lot numbers, product information, etc.
- Labels can be reprinted at any time – current or history.
- Reports can be printed, emailed, or stored as pdf.
- Browser based multi-user application with a SQL Express database.
- Role based access codes, restrict functions for each user as needed.
- Audit log provides audit trail for any changes made to each record – new, edit, or delete.

Shop Floor Scanning

- Setup up to 10 operations per item to be performed in order; track as much or as little as desired
- Shop floor scanning application captures when operation is performed and stores date/time and employee who performed operation in serial number history
- Optional workstation sharing allows for multiple employees working on same scanning station
- Track employee efficiency and accountability for quality of work
- Production Totals screen for bird-eye view of daily production schedule and easy tracking of progress throughout the day; self-refreshing version to be displayed on production floor.
