

Shipping Solution

Save time and reduce errors when shipping with FedEx or UPS

Do you ship goods to your customers through FedEx and UPS, spending lots of time re-entering information and creating shipping orders on their respective websites? The Traverse Shipping Solution will save you time, improve the accuracy of your shipping process, and give you history and tracking information right from your Traverse screens.

With Traverse Shipping Solution, you can:

- Seamlessly tie FedEx and UPS services with Traverse, providing the customer and shipping information already in the Traverse system to UPS WorldShip® or FedEx Ship Manager®.
- Keep shipping-critical information on file, such as whether a customer is in a residential location or uses an alternate address for shipments.
- Change shipping order information quickly and easily for each shipment as necessary.

One-click import takes care of your shipping financial transactions

- The Traverse Shipping Solution pulls tracking numbers and shipping information into the Traverse system so it is easily accessible by the customer.
- Freight cost is automatically calculated and placed into Traverse, all without needing to input any information into UPS WorldShip or FedEx Ship Manager.
- If the customer is set up on a prepay and add basis, the shipping cost is added to the billing amount when the order is complete, quickly and easily for each shipment as necessary.

Enhanced reporting for shipping

- The Traverse Shipping Solution includes an interactive view called Shipping Details View. This view allows you to sort information for each shipped order, including tracking numbers, charges, weight, and more.
- Drill down to source information for customers and transactions. Filter information to view shipments sent by each shipping company
- Need more information from FedEx or UPS? The Shipping Details View provides one-click access to shipment-specific information from the shippers' web services.

The screenshot displays the TRVERSE application window. On the left is a navigation pane with categories like Sales Order, Interactive Views, Transactions, and Favorites. The main area shows the 'SO Shipping Details View' with a filter '[Ship Via] Begins with FedEx'. Below the filter is a table of shipment data:

Post Run	Transaction ID	Customer ID	ShipNum	TotalCharges	ShipVia	ActualWeight
	00182584	_MICRO	999999999999	7.25	FEDEX	2.5000000000
	00182585	_MICRO	999999999999	7.75	FEDEX	2.5000000000
20120501160858	00182551	STTA03	023394460025897	20.12	FEDEX	14.5500000000
20120501161137	00182551	STTA03	023394460025890	5.33	FEDEX	1.2500000000
20120503210400	00182548	ROBR04	023394460025873	13.26	FEDEX	3.4000000000
20130606134858						1.2000000000

Overlaid on the bottom right is a 'WebForm' window titled 'FedEx Tracking'. It shows the tracking number '2023394460025880' and a status of 'Delivered' with a green checkmark. The delivery date is 'Thur 4/26/2012' and the location is 'GREENVILLE, SC US'. The FedEx logo and navigation links (Ship, Track, Manage, Learn) are visible at the top of the overlay.
