

Shop Floor

Shop Floor for Traverse version 11 is a solution for manufacturing operations that can help you grow your business by streamlining your processes and increasing the speed and accuracy with which your team enters data. Users can utilize a variety of input devices to enter their production information—as well as labor or machine time—right from the shop floor.

When you rely on Shop Floor to capture your business-critical information, you'll speed up your processes while reducing the chance of entry error. And because Shop Floor ties in closely with all Traverse applications, you will improve the real-time communication throughout your organization.

With Shop Floor for Traverse version 11, you can:

- Record labor or machine time
- Record production and materials
- Make real-time inventory updates throughout the manufacturing process
- Ensure quality by taking advantage of the Quality Control functionality within Shop Floor
- Take advantage of the portable, easy-to-use user interface for machine operators

Questions

In the Shop Floor order screen, the user can scan in the order, choose from the pull down field, or enter the information with a keyboard.

Integration tools open up a world of input devices

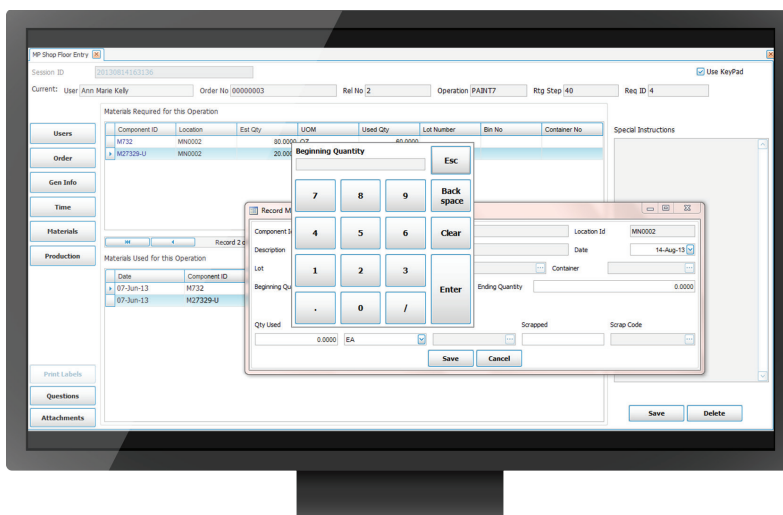

Whether your work requires handheld scanners, touchscreens, scales, tablets, or just a simple keyboard, Shop Floor for Traverse version 11 can integrate with your industry-standard tools and automate your entry processes.

If your company relies on tablets or touchscreens, the built-in keypad functionality will help speed up entry on the shop floor.

Quality review on the floor

You'll gain enhanced decision-making ability based on quality control, and be able to make the production adjustments necessary to keep your customers satisfied.

User-defined quality assurance questions help ensure speedy completion of required checks.
