Traverse Specialty Solutions

Our Specialty Solutions for Traverse provide you with the power and flexibility to bring specific benefits to your system. From mobile warehouse capabilities to integration with popular shipping companies, it's simple and easy to extend to power of Traverse to all areas of your business.

Solutions

Customer Portal (Inquiry & Order Entry)
Provide an instant response to your customer's account information inquiries with the Traverse Customer Inquiry & Order Entry Portal. When your customers use this self-service, you have fewer operating expenses for your company and fewer calls to your customer service department. Integrating the Portal into your Traverse system gives your business a vast competitive advantage, real-time information, and ordering powers at your clients' fingertips.

PO Routing & Approvals
With Purchase Order Routings and Approvals Portal for Traverse, you can provide your purchasers the freedom they need while limiting who can make requisitions and at what monetary point you must be consulted, without requiring a full installation of Traverse. Our tablet-friendly Portal automatically routes the requests through the right representatives, and allows you to approve or deny purchases from anywhere.

Sales Rep Portal
Your sales representatives can't be in the office every minute of every day. With Traverse Sales Rep Portal, they don't have to be. This Portal gives your sales staff online, instant access to customer accounts 24 hours a day, 7 days a week. Your sales reps have access to customer accounts anywhere, at any time.

Advanced Warehouse Management
Advanced Warehouse Management brings you the powerful capabilities of Traverse Warehouse Management, adding many different functions including mobile capabilities to your warehouse. This application dramatically improves efficiency in picking, packing and shipping orders by streamlining day-to-day activities and maximizing the productivity of your warehouse staff.

Shop Floor
Shop Floor for Traverse version 11 is a solution for manufacturing operations that enables your employees to easily and efficiently use a variety of input devices to enter their production information—as well as labor or machine time—right from the shop floor.

Functions

Shipping Interface
The Shipping Solution ties FedEx and UPS services with Traverse, linking the customer and shipping information already in the Traverse systems with UPS WorldShip® or FedEx Ship Manager®. Pull tracking numbers and shipping information into Traverse so it is easily accessible by customer, and automatically calculate freight cost without duplicating entry.

AP/PA Check Electronic Signature
Fully automate your check printing processes. With AP/PA Check Electronic Signature, you can print signatures on Accounts Payable Checks and/or Payroll checks, allowing for differing signatures for different banks.

Customer/Vendor Alerts
With this function, notes will pop up in Traverse when transactions are attempted for flagged customer and/or vendor records. This function works in Accounts Payable, Purchase Order, Accounts Receivable, Sales Order, and Service Director.

PO Landed Cost by Shipment
Do you count on landed cost to accurately track your shipping and inventory expenses? Use PO Landed Cost by Shipment to allocate landed cost across multiple purchase orders (designated by a "Shipment ID").
