

Synoptix – Report Writing Made Easy

What you do matters. That's why Synoptix enables you to answer the all-important questions: how are we doing? Why are we on or off track? What is the best course of action? Good decisions generate other good decisions, so having answers to these vital questions is essential for your company's long term health.

Comprehensive Drill Down Capability

Synoptix allows you to drill down to source document information on any summary data field with just a click of your mouse; no special programming required. Imagine the power of being able to analyze any number you see on a report just by clicking on it.

Schedule Reports to Run and be Distributed Automatically

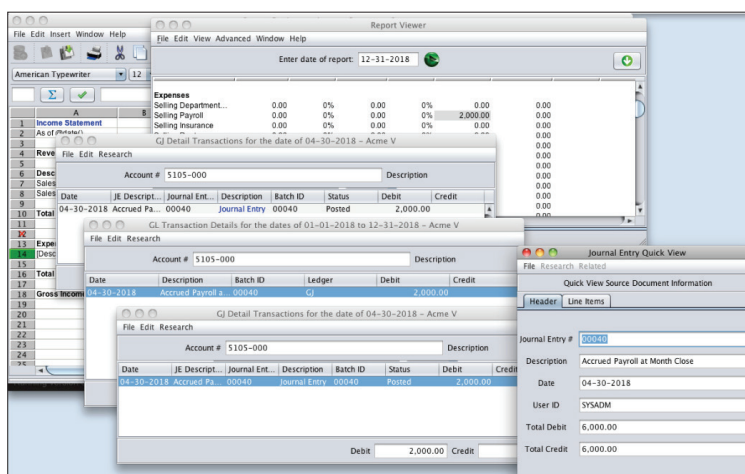

Eliminate the hassle of report distribution to team members with Synoptix's scheduling server. The server automatically runs scheduled reports on pre-determined schedules in HTML, PDF, or spreadsheet formats. Once published, Synoptix can automatically email reports to team members or point them to your intranet, internet, or other distribution products.

Interactive Reporting

Synoptix will revolutionize how quickly you can view critical business metrics with its built-in ad hoc reporting capabilities. Build reports with drag-and-drop procedures for fast analysis with team members using a detailed view of your data, or graph it out with a more visual look and feel. Interactive Reporter is perfect for users who want to get in and see data quickly without having to use technical SQL query tools. This is another way that Synoptix is empowering companies with an important competing edge in an ever changing corporate environment.

View Your Key Performance Indicators

You can create dashboards with graphs, charts, gauges, and reports using simple point and click procedures. Group a series of reports together in a single packet that puts all your critical performance indicators at your fingertips.

Easily drill all the way down to your source data for a comprehensive analysis of your key performance indicators.

Synoptix - Report Writing Made Easy

Familiar Report Environment

Synoptix has the look and feel of a standard spreadsheet, but because of its direct connection to your database it completely eliminates the common pitfalls of spreadsheets.

Easy-To-Use Date Functionality

Ever try to create a report that shows Year-to-Date, Month-to-Date, and Quarter-to-Date information on the same page? How about previous three months or a rolling twelve months? With Synoptix, defining any of these date functions is a single click on a pull-down list. What previously took a programmer several hours now takes a standard user less than a minute to create.

Combine Data From Multiple Data Sources in One Report

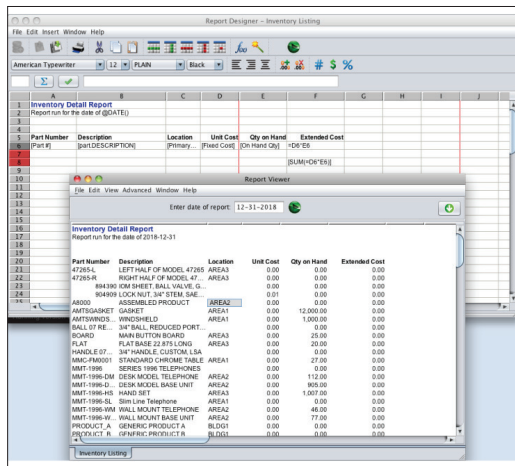

Pulling in data from multiple companies and spreadsheets is incredibly easy. You can even create consolidated financials with data from other ERP systems. Synoptix also enables you to pull in data from multiple areas within your database and have it displayed on a single report, eliminating the need to create multiple reports and then combining the results in a spreadsheet.

Painless Consolidations, Eliminations and Multi-Currency Conversions

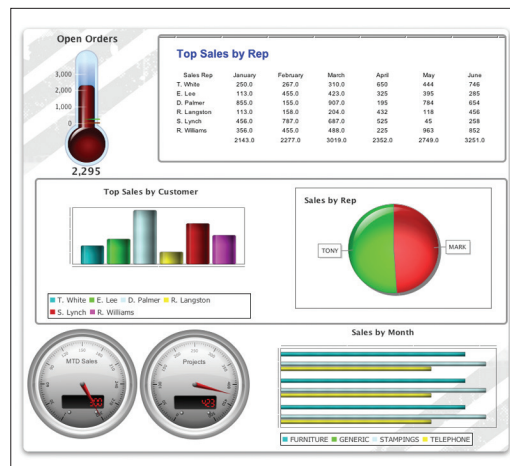

Synoptix makes burdensome consolidations a thing of the past—including companies with different charts of accounts. The application even handles inter-company eliminations.

Comprehensive Tutorials & Continuing Education Opportunities

Designed with ease of use in mind, Synoptix ships with extensive documentation on reporting best practices. The Tutorial icon on the home screen delivers step-by-step instructions to create many different types of Synoptix reports. Because it's a live feed, your tutorials will be continually updated and notify you automatically when a new one becomes available.

Synoptix is much more robust than any spreadsheet program or plug-in.

Easily create dashboards for quick review and comparison of your numbers.
