

# Traverse Portal Application

## Web-based interfaces for a new business age

Stay competitive with platform-independent, feature-rich, affordable, browser-based Traverse Portal Applications. Fully integrated with the Traverse ERP system, our Portal Applications give you the tools you need to stay connected to your business anytime, anywhere, and on any Internet-capable device.

- Turnkey solutions allow your customers to view sales information or to place orders online.
- Sales reps can enter orders when they are away from the office, and get instant answers to customer inquiries online.
- Improve your customer service and save time for both you and your clients by providing online access to data.
- Cut overhead costs by reducing the need for costly internal administrative resources.
- Ensure privacy and security for your staff and customers with streamlined new user setup and custom menu access.
- Management-specific views for immediate access to mission-critical business information through the web browser or mobile device.
- Invoice payment can be processed through the Transaction Payment System (TPS).
